

## Key coastal management issues for the 2007 NSW State Election

### Responses from Elected Representatives

**Table 2: Key coastal management issues for the 2007 NSW State Election responses from Elected Representatives**

Elected Representative	An independent coastal advisory body for NSW	A strategy for managing the impact of climate change on the coastal zone	Funding for Local Government and community coastal programs and initiatives	Public participation in the strategic planning and major development assessment in the coastal zone	Maintenance of public ownership and public access in the coastal zone
<b>The Hon. Alex McTaggart (Member for Pittwater)</b>	Fully Endorses the proposal to an independent coastal advisory body for NSW.	Supports the development of a risk management strategy for managing the impacts of climate change.	Will lobby for Government to provide the necessary funding for Local Government and community coastal programs and initiatives	Supports public participation in the strategic planning and major development assessment in the coastal zone	Supports <b>Maintenance of public ownership and public access in the coastal zone</b>
<b>The Hon. Clover Moore (Member for Bligh)</b>	Supports the establishment of an independent coastal advisory body for NSW.	Supports the development of a risk management strategy for managing the impacts of climate change. Efforts to address this have included: Opposition to the Anvil Hill coal mine proposal Support for strengthening BASIX. Calling for long term solutions to Sydney's transport problems .	Believes State and Commonwealth funding for Local Government and community coastal programs and initiatives is required.	Opposes recent amendments to Environmental Planning and Assessment Act that reduce opportunities for public participation in strategic planning and development assessment.	Supports <b>maintenance of public ownership and public access in the coastal zone and has promoted maintained public access at Elizabeth bay, Black Wattle Bay and Rushcutters Bay.</b>
