Enable

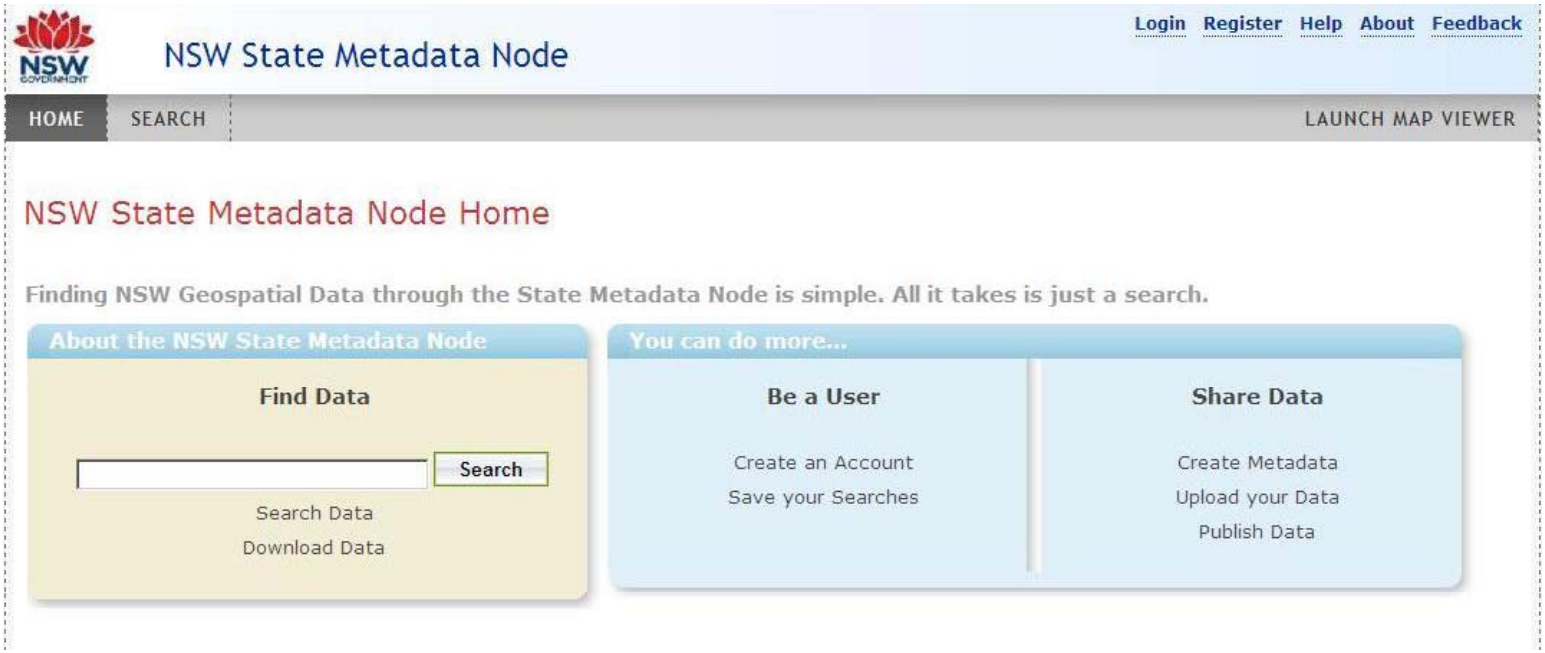
The Common Spatial Information Initiative

- CS2*i* is a cross agency service that will provide common e-Business functions required for customers to access spatial and related information in an online environment.

- Operationally CS2*i* will comprise
  - A Governance Framework
  - An Enabling Framework

An Enabling Framework will offer

- The capacity to access spatial information cost effectively
- Provide access to common tools and services that will provide a seamless means of accessing integrated spatial information, based on the business requirements of the agencies
- SIX is an integral component of the enabling framework



Governance Framework

- Governance is a critical enabler for the delivery of SDI's
- A Governance framework will assist
  - Interactions between agencies
  - Help breakdown information silos
  - Discoverability and access
  - Communication of interests & Resolution of issues
  - Policies and Standards
